

AREA AND PERIMETER OF RECTANGLES

Name: _____ Class: _____ Due Date: _____

Family Member Signature: _____

Objective:

To review finding the area and perimeter of rectangles.

Necessary Information:

Perimeter is the distance around a shape. It is measured in units.

Area is the space inside a shape. It is measured in square units.

Practice Section:

1. Use the diagrams to complete the blanks.

b = _____ h = _____

A = _____

P = _____

b = _____ h = _____

A = _____

P = _____

$$b = \underline{\hspace{2cm}} \quad h = \underline{\hspace{2cm}}$$

$$A = \underline{\hspace{2cm}}$$

$$P = \underline{\hspace{2cm}}$$

8 cm

$$b = \underline{\hspace{2cm}} \quad h = \underline{\hspace{2cm}}$$

$$A = \underline{\hspace{2cm}}$$

$$P = \underline{\hspace{2cm}}$$

In Your Real World:

With a family member, find a rectangular object at home. Sketch the object, measure and label the base and height. You may use untraditional units of measurement such as lego lengths, eraser widths, candy etc. Determine the area and perimeter.

$$h = \underline{\hspace{2cm}}$$

$$b = \underline{\hspace{2cm}}$$

$$A = \underline{\hspace{2cm}}$$

$$P = \underline{\hspace{2cm}}$$
